GOODS AND SERVICES INFORMATION

For Scientific, surveying, optical, weighing, measuring, signaling, and checking apparatus and instruments, namely, fiber optic meters, fiber optic instruments, namely, fiber optic light sources for use with fiber optic test meters, optically isolated adapter for printers and remote control devices, optically isolated external trigger probes for use with electronic measures; electronic test and measuring instruments and devices and electronic test tools, namely, local area network electronic meters, electronic cable mapping units, digital troubleshooting systems comprised of computer hardware and software used to diagnose and analyze electronic devices and computer hardware, electronic meters for testing automotive electrical systems, cable testers, cable identification modules for use with cable testers, protective holsters for electronic meters, computer software and hardware for use in testing and isolating faults in digital circuitry, electric apparatus for measuring the insulation of wires, cables, transformers and electrical motors, frequency counters, high frequency probes, frequency synthesizers, frequency comparators; apparatus and instruments for regulating, analyzing, and controlling electricity, temperature, humidity, and power, namely, current measuring clamps; electronic monitors and measuring devices, namely, electronic meters for analyzing the quality of electrical power, signal tracers for tracing and identifying electrical signals in electrical circuits and ultrasonic leak detectors; temperature profiling systems comprised of thermocouples and computer software for analyzing temperatures and logging data in the fields of electronics manufacturing, finishing, and food processing; measuring apparatus for temperature and humidity levels in gases and solid substances; thermocouples,

thermometer readout devices comprised of thermometers and digital readout units. thermometer calibrators, temperature and humidity meters not for medical use; electrical measuring and testing devices with electrical standards settings, namely, voltmeters, ammeters, and ohmmeters; portable oscilloscope devices, namely, integrated oscilloscope, digital multi meter, and paperless electronic data recorders sold as a unit; diagnostic equipment, namely, an optical source and power meter for measuring optical loss in fiber optic cabling systems; measuring and calibrating instruments, namely, fluid flow calibrators and meters; electronic circuit parts and accessories, namely, digital circuit adaptors, digital circuit connectors and digital circuit cables; test leads, in the nature of probes to connect electric test equipment to electronic devices for testing; voltmeter probes; oscilloscope probes; clips, namely, crocodile, alligator, bus bar, and piercing test clips, sold separately or as a unit with clamp meters for measuring electricity; battery packs; meters, namely, temperature meters and micro amp meters for monitoring heating ventilation air conditioning units; measuring apparatus for refrigerant leak detection, namely, electronic leak detection hardware and operating software; infrared thermometer for temperature measurement without contact; electrical testers, namely, voltage testers, electrical ground testers; electrical insulation testers; digital multi meters; calibrators for calibrating thermometers, thermocouples, thermocouple probes, pressure transmitters, flow control valves, flow transmitters, temperature transmitters, and level transmitters; power quality meters; recorders, namely, data logger for recording voltage, amperage, and power measurements, electronic and digital voltage and power quality recorders and voltage and power event recorders; analyzers, namely, electronic analyzers for measuring and testing power; gas-flow analyzers; safety equipment, namely, electronic electricity analyzers. timer analyzers, namely, electronic analyzers for measuring time, frequency, and phase; counter analyzers, namely, electronic analyzers for measuring time, frequency, and phase; air quality analyzers for measuring temperature, velocity, humidity, carbon dioxide, carbon monoxide, and airborne particle concentrations; particle analyzers; carbon monoxide analyzers for measuring carbon monoxide levels; temperature devices, namely, temperature indicators, probes, sensors, transmitters, calibrators, and microprocessor-based infrared temperature measurement units comprised of thermometers and thermocouple probes; thermometers; thermometer probes for non-medical use; laboratory equipment, namely, temperature fluid baths; humidity meters; timers; time counters, namely, electronic tools for measuring time intervals, time rise and fall, time periods, duty factor, frequency, pulse width, count totalization, and phase; ratio counters, namely, electronic tools for measuring frequency ratios, voltage ratios, infrared ratios, calibration test ratios, temperature ratios, and resistance ratios; frequency counters; frequency burst counters; voltage counters, namely, tools to count voltage, continuity, and current; rise and fall time counters; electronic data loggers, namely, data acquisition instruments for collecting, storing, monitoring, and analyzing equipment performance data comprised of hardware, software, and portable and/or networked data logging acquisition units; measuring apparatus, namely, clamp meters for measuring electricity; electric current probes; current clamps, namely, electrical current clamps for testing and measuring electricity, currents, and voltage; process calibrators; air quality measurement instruments, namely, electronic monitors for measuring temperature, velocity, humidity, carbon monoxide, carbon dioxide, air velocity, air flow, air pressure, and differential pressure; air quality particulate measurement instruments, namely, particle counters and electronic particle source locators. electronic based instruments for measuring temperature and humidity levels; phase rotation meters; infrared and thermal imagers not for medical use; infrared temperature measurement instruments, namely, temperature sensors; copper cable testers and analyzers; fiber cable testers and analyzers; wireless network analyzers; biomedical test instrumentation and software, namely, automated biomedical equipment test systems comprised of hardware, software, and data recorders for monitoring and inspecting the performance

and electrical safety of biomedical equipment; medical testing equipment, namely, blood pressure simulators and patient simulators for use in testing medical equipment; electronic pressure monitors, namely, atmospheric or barometric pressure monitors; thermo-hygrometers; ultrasound watt meters; electronic gas flow analyzer, namely, hardware and software for analyzing gas flow in ventilators; clinical laboratory testing equipment, namely, test lungs used to test functionality of ventilator equipment; clamp meter accessories, namely, electrical testing leads, electrical current probes, rogowski based current probes, inductive current probes, Hall effect current probes, and electrical connectors in the nature of crocodile, alligator, bus bar, and piercing test clips, sold separately or as a unit with clamp meters for measuring electricity; computer hardware for the foregoing goods, specifically excluding computer network routers or Ethernet hubs; computer peripherals; specially adapted cases for the foregoing goods; mounting racks for the foregoing goods; all of the foregoing goods sold separately or in various combinations

GOODS AND SERVICES INFORMATION

For electronic catalog services and online retail store services in the fields of electronic, opto-electronic, photonic, and nano-scale test, signaling, imaging, and measurement apparatus, instruments, systems, equipment, parts, components, and accessories

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For maintenance, repair and installation services relating to electronic, opto-electronic, photonic, and nano-scale test, signaling, analysis, imaging, measurement, scientific, and optical apparatus, instruments, parts, systems, equipment, and accessories therefor; repair and refurbishing of electronic, opto-electronic, photonic, and nano-scale test, signaling, analysis, imaging, measurement, scientific, and optical apparatus, instruments, parts, systems, equipment, and accessories therefor; technical support services in the nature of providing information and consultation regarding the installation of computer systems used with test and measurement systems, and providing an Internet web site featuring technical information related thereto

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For electronic test and measurement instruments, namely, oscilloscopes and parts therefor; electronic instruments in the nature of signal generators, namely, analog and vector signal generators, waveform generators, function generators in the nature of electronic devices used to generate various types of repeating waveform signals over a wide range of frequencies, pulse and data generators, arbitrary waveform generators, noise generators in the nature of electronic devices that produce random signals, and signal generation devices synthesizing electronic signals, and synchronization modules for various types of signal generators; electronic test and measurement instruments in the nature of analyzers, namely, spectrum, vector, signal, network, power and power source, protocol, radio frequency, microwave, logic, modulation-domain, optical component, light wave component, optical modulation, time-interval, polarization, and photonic dispersion and loss analyzers; automatic test equipment for integrated circuits, circuit boards and electronic equipment, namely, flat panel display testers, system on a chip (SOC) testers, memory testers, parametric testers, automated optical inspection testers, and in-circuit testers; electronic and optical communications instruments, namely, light wave testers and light wave multimeters; electronic component of digital multi-meters for testing and measuring voltage in electrical products; measuring instrumentation and apparatus, namely, digitizers; test and measurement equipment, namely electromagnetic interference receivers, radio frequency interference receivers, and electromagnetic compliance products, namely, electromagnetic interference receivers for testing electromagnetic compliance and making conductive emission measurements; polarization controller units used to change light from any polarized or unpolarized light source into any well-defined state of polarization; electronic test and measurement instruments, namely, electric meters, inductance meters, capacitance meters, resistance meters, impedance meters, testing meters, wavelength meters, frequency meters, and frequency counters; electrical and electronic measuring and testing devices, namely, DC electronic load measurers and testers; electronic test and measurement instruments in the nature of testers, namely, cable, antenna, voltage, amperage, telephone line, and continuity testers; electronic test and measurement instruments, namely, handheld cable and antenna tester with optional spectrum analyzer, network analyzer, and power meter; electronic testing equipment, namely, power meters for testing radio frequency and microwave signals; electronic and optical communications instruments and components, namely, communication link testers for testing communication links and telecommunication line integrity testing apparatus; testing apparatus for testing circuit boards; electronic apparatus for testing electromagnetic properties and characteristics of industrial materials; electronic test and measurement instruments, namely, voltmeters and source measure units; test and measurement equipment, namely, one box testers containing a signal source and a signal analyzer for testing microwave and wireless communication devices and designs; electronic test and measurement instruments, namely, interferometers, electrical transducers, and vibration transducers; electronic test and measurement instruments, namely, nano indenters for nanomechanical testing of semiconductors, thin films, wafer applications, hard coatings and DLC films, composite materials, fibers, polymers, metals, ceramics, and biomaterials; component features of electronic testing, signaling, diagnostic and measurement systems and equipment used in signal generators, signal analyzers, arbitrary waveform generators, pulse generators, and one-box testers, namely, mobile cellular and wireless local area network (WLAN) testers and network analyzers; electronic component in the nature of software and hardware, namely, digital signal processor and its controlling algorithm, sold as integral components of waveform generators, for improving signal fidelity and signal breadth; encoders; data processing equipment, namely, couplers; amplifiers; electrical signal attenuators; electricity limiters; multipliers; testing apparatus for testing fiber optics; electric switches; electronic switches; optical

switches; probes for testing integrated circuits, semiconductors, and telecommunication networks; electronic, opto-electronic, photonic, and nano-scale test, signaling, imaging, and measurement apparatus and instruments, namely, amplifiers, attenuators, filters in the nature of signal processors that function to remove unwanted frequency components from the signal, to enhance wanted ones, or both, conditioners in the nature of devices used to prepare sensor output signals for processing, converters, mixers in the nature of devices for creating new frequencies from two or more signals applied to it, modulators in the nature of devices for varying one or more properties of a periodic waveform in order to carry a signal, demodulators, prescalers, dividers in the nature of devices for coupling a portion of the signal in a transmission line to a port enabling the portion signal to be used in another circuit, combiners in the nature of devices for combining the signals at a port into the signals already present in a transmission line, isolators in the nature of a non-reciprocal 2 port device that allows signals to pass in one direction only, circulators in the nature of a non-reciprocal multi-port device in which a signal entering any port is transmitted only to the next port in rotation, integrated diode limiters, switches and routers for performing signal generation, signal processing, signal amplification, signal conversion, and signal control; lasers for measuring purposes and accessories therefor, namely, monolithic laser combiners, laser heads, beam splitters, beam benders, beam translators, retro reflectors, adjustable mounts, plane mirrors, plane mirror converters, plane mirror reflectors, and turning mirrors; lasers not for medical use; microscopes; microscopes, namely, atomic force microscopes; microscopes, namely, scanning electron microscopes; recording apparatus for recording traffic on telecommunications networks; portable electronic recorder for measuring and recording multiple voltage, current and thermocouple readings from various transducers; electric sensors; industrial calibration sensors; optical sensors; timing sensors; ultrasonic sensors; surface acoustic wave sensors; sensors for measuring air pressure, temperature, and humidity; sensors for monitoring the temperature of an object being measured; transmitters of electronic signals; electronic and optical communications instruments and components, namely, optical transmitters and electro-optical transmitters; wireless transmitters and receivers; receivers of electronic signals; electronic and optical communications instruments and components, namely, optical and opto-electrical receivers; remote controls for electronic test, signaling and measurement apparatus, systems, and equipment; computer hardware; computer peripherals; a full line of operating system software programs for non-medical scientific instruments and for electronic test, signaling, and measurement instruments and equipment; a full line of computer software for designing, configuring, calibrating, and testing non-medical scientific instruments and electronic test, signaling, and measurement instruments and equipment; a full line of computer software for collecting, measuring, analyzing, storing, manipulating, and managing data obtained from non-medical scientific instruments and from electronic test, signaling, and measurement instruments and equipment; software, namely, electronic design automation (EDA) software for communications product design, for RF and microwave circuit, high-speed, signal integrity, device modeling, and signal-processing design, and for electro-thermal, electromagnetic, circuit and system design and simulation; data processing apparatus; power supplies; power supplies and power systems used to power and test the operation of electronic equipment and devices under test by providing multiple power levels to the electronic equipment; programmable power supplies and power systems for simulating various operating conditions of electronic equipment

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For design and development of computer software; computer programming services; software programming services; software maintenance services; engineering services; calibration of scientific, electronic, opto-electronic, photonic, and nano-scale test, signaling, analysis, imaging, measurement, and optical apparatus, instruments, systems, equipment, parts, components, and accessories; technical support services, namely, providing technological information, technological consultation, design and diagnostic services in the fields of electronic, opto-electronic, photonic, and nano-scale test, signaling, imaging, and measurement apparatus, instruments, systems, equipment, parts, components and accessories, and providing an Internet web site featuring technical information related thereto; technical support services in the nature of providing technological information and consulting in the field of test, measurement and computer systems, computer system design, computer systems integration, and computer software installation, and providing an Internet web site featuring technical information related thereto; technical support services in the nature of computer systems analysis and computer systems integration services, and providing an Internet web site featuring technical information related thereto; technical support services in the nature of start-up assistance with technology specifications, namely, analyzing technology requirements and developing recommendations for the computer software and systems and other technology needed to meet those requirements, in the field of electronic, opto-electronic, photonic, and nano-scale test, signaling, imaging, and measurement equipment; computer services, namely, hosting of websites featuring online forums for users to obtain information in the fields of electronic test, signaling and measurement equipment; providing a website that gives users the ability to generate and share software script and plug-ins and to share software and data with other users

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

Mark Literal(s) BROWARD COUNTY BAR ASSOCIATION 1925 FIDELITY TO LAW & TRUTH

CASE IDENTIFIERS

Serial Number 86290739 **Application Filing Date** May 23, 2014 **Register** Principal **Mark Type** Service Mark **Publication Date** Dec. 30, 2014

MARK INFORMATION

Standard Character Claim No **Mark Drawing Type** 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) **Description of the Mark** The mark consists of the words "BROWARD", "COUNTY", "BAR", "ASSOCIATION", "FIDELITY", "TO", "LAW", "TRUTH", an ampersand "&", and the numerical display of "1925". All words are shown in all capitals. The mark as a whole is displayed as a circular object containing 3 layers. The outer most layer is prominently displayed in various shades of gold and yellow. There is a thin black line running in between the yellow and gold shades of the outer layer. The bottom right quarter of this layer of the circle is displayed in dark shades of brown and orange. The 2nd layer of the circular object is displayed beneath the outer layer of yellow, gold, brown and orange. It is shown in a dark blue shade with a darker shade near the bottom of the layer and contains the words "BROWARD", "COUNTY", "BAR", "ASSOCIATION", "1925", and 2 stars. The piece of this layer closest to the center is a gold line. The arrangement of "BROWARD 1925 COUNTY" starts from the upper-left quadrant of this layer and revolves clockwise around the 3rd layer. The arrangement of "BAR ASSOCIATION" starts at the bottom left-hand quadrant of this layer and runs down, around, and counter-clockwise to the 3rd layer. The first star is located in-between the letter "B" in "BROWARD" and the letter "B" in "BAR" and is equally spaced away from each word. The 2nd star is located in-between the letter "Y" in "COUNTY" and the letter "N" in "ASSOCIATION". Beneath the 2nd layer's gold line, the background is displayed with a dark blue background at the center that gradually turns to black as it expands closer to the edges of the circular object. The arrangement of "FIDELITY TO LAW & TRUTH" is displayed near the top portion of this 3rd layer, beneath the gold line of the 2nd layer, and centered. The arrangement of "& TRUTH" is displayed beneath the arrangement of "FIDELITY TO LAW" and centered. Down and to the left of "FIDELITY" is a leaf stem with 9 leaves attached, all in gold coloring. The stem begins around the center and left-quadrant of this layer and curves up and to the right. A second leaf stem is on the opposite side of this layer except it is positioned down and to the right of the word "LAW" and curves up and to the left. To the right of the 1st leaf stem is a depiction of a scholar sitting down, looking down at a piece of paper, while holding it partially opened and partially folded, displayed in various shades

of gold, yellow, brown, and orange. To the right of this depiction is a pillar with a scale of justice resting on top of it. The pillar contains 7 round and rectangular shaped objects that form the support to the pillar. Each rectangular-shaped object gradually turns from yellow to orange as it runs from the top of the pillar to the gold line from the 2nd layer and stops once it intersects the same. The scale of justice on top of the pillar shows both scale equally balanced. **Color Drawing** Yes **Color Claimed** The color(s) Yellow, Gold, Brown, Orange, Dark Blue, and Black is/are claimed as a feature of the mark. **Disclaimer** "BROWARD COUNTY BAR ASSOCIATION" AND "1925"
