For Repair of machines and apparatus for measuring, calorimetry, metrology, assembly, monitoring, testing and packaging; installation of machines and apparatus for measuring, calorimetry, metrology, assembly, monitoring, testing and packaging; maintenance and repair of laboratory apparatus and installations; adjustment, maintenance, repair of measuring apparatus, namely, repair and maintenance of thermal analyzers and measuring, calorimetry, metrology, assembly, monitoring, testing and packaging instruments and apparatus

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For Scientific apparatus and instruments for the purposes of analyzing not for medical purposes, namely, calorimeters, temperature sensors, and analytical microbalances; apparatus and instruments for metering, recording and measuring, namely, apparatus and instruments for the purposes of metering, recording and measuring tactile or non-contact dimensional measurements, namely, flowmeters, micrometers, dimension or length measuring gauges, optical metrology inspection systems comprised of a light source, one or more cameras and sensors in communication with computer software and hardware, depth

gauges, instruments for measuring length, optical frequency metrology devices, and X-ray apparatus not for medical purposes; electronic control and monitoring apparatus, namely, electronic control and monitoring apparatus for the purposes of taking tactile or non-contact dimensional measurements, namely, flowmeters, micrometers, dimension or length measuring gauges, optical metrology inspection systems comprised of a light source, one or more cameras and sensors in communication with computer software and hardware, depth gauges, instruments for measuring length, optical frequency metrology devices, and X-ray apparatus not for medical purposes; electronic control and monitoring apparatus, namely, calorimeters, temperature sensors, and analytical microbalances; electronic control and monitoring apparatus, namely, calorimeters and micro-calorimeter, spectrometers for measuring radiation, scanners, dosimeters; measuring apparatus, namely, apparatus for the measurement of nuclear materials and waste, namely, calorimeters and micro-calorimeter, spectrometers for measuring radiation, scanners, dosimeters; software, namely, computer programs for use in the operation of non-medical ultrasound detectors, computer software for use in operating and controlling laboratory instruments for measuring dimension, length, temperature, mass or weight; computer programs for use in operating nuclear measurement apparatus and instruments and for acquisition and processing of data collected by said measurement apparatus and instruments; resistance measuring instruments

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Processing and forming of metals, namely, cutting, stamping, sheet metal working, boiler making, metal fabrication and finishing services for others, metal casting, forging of metal goods to the order and specification of others; processing of metal or composite materials, namely, cutting, stamping, sheet metal working, boiler making, metal fabrication and finishing services for others, metal casting, forging of metal goods to the order and specification of others; providing material treatment information; mechanical treatment and transformation of metal objects, namely, electro and metal coating, metal treating and casting, hardening of metal and metal products, metal fabrication and finishing services for others, metal casting, forging of metal goods to the order and specification of others; services for the forging, working of metal parts and, surface treatment of metals and metal plating, namely, forging of metal goods to the order and specification of others, electro and metal coating, metal treating and casting, hardening of metal and metal products, metal plating, thermal treatment, namely, heat treatment and coating of aircraft fuselages, automotive body panels, engine parts, avionic housing and structural parts; welding services

International Classes 40 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Material Treatment

For Research and design of laboratory measuring and metrology machines, apparatus and instruments for others; technical studies in the field of laboratory measuring and metrology, namely, conducting scientific research for others in the field of metrology; engineer's work in the nature of expert reports in the field of laboratory measuring and metrology apparatus and instruments, namely, conducting scientific feasibility studies, conducting of feasibility studies in the field of new metrology technologies; chemical analysis; calorimetric analysis, namely, conducting scientific research for others concerning the amount of heat involved in a chemical reaction; thermal analysis, namely, conducting scientific research for others concerning the amount of heat involved in a chemical reaction; volumetric analysis, namely, conducting scientific research for others concerning the volume of reagents involved in a chemical reaction; engineering; research and development of new products for others; testing of materials for others; evaluations, assessments and research in the fields of science and technology provided by engineer, namely, structural engineering design services; providing technical assistance, namely, engineering; technical project study, namely, conducting scientific research for others concerning the volume of reagents involved in a chemical

reaction; quality control for others using metrology apparatus and instruments; scientific research laboratory services; engineering work, namely, surveying; electromechanical research, namely, conducting scientific research concerning the design of mechanical, electromechanical and optoelectronic apparatus and instruments for others; mechanical research using metrology apparatus and instruments; design and planning of industrial installations and machines for others, namely, architectural design of industrial installations for others, custom design and development of industrial machines for others for measuring dimension, length, temperature, mass or weight; design, installation, maintenance, development and updating of computer software for thermal analyzers, measuring, calorimetry, metrology apparatus and instruments for others; measurements, checks and diagnostics for performance and compliance, namely, calibration services for others; development of metrology apparatus, namely, custom design and development of calibration and measuring apparatus for others

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

For Transportable buildings of metal; non-electric cables and wires of common metal; ironmongery in the nature of metal hardware, namely, metal nuts, metal bolts, eye bolts, metal screws; stainless steel metal containers, namely, containers of metal for transport, containers of metal for compressed gas, containers of metal for chemicals, compressed gases and liquids; booths of metal, in particular paint spray booths of metal; frames of metal for building; metal profiles; rails of metal; pipework of metal, including those from copper alloy, aluminum and stainless steel; metal sliding valves and valves of metal other than parts of machines; couplings for pipes of metal; junctions of metal for pipes and hoses; metal clips and pipe clips of metal; flanges of metal; knobs of metal; angle shaped metal parts for vehicle construction in the nature of component parts of land or air motors and joints for electric cores, namely, metal engine stands, metal pipe couplings; upright signboards of metal and structural parts and fittings for all the aforesaid goods; metal containers for liquids, gases and steam other than parts of machines, namely, containers of metal for chemicals, compressed gases and liquids; industrial boiler-making articles of metal, namely, metal ducts, vats, molds, tanks, silos; structures of metal, namely, walkways, frames works, stairs, handrails, railings; aluminum composite tubing for use in the manufacture of aircraft frames; films and sheets made from metal for use in the manufacture of circuit boards; metal supports for aircraft engine covers, metal covers, engine protection, namely, metal engine stands; metal sheets, namely, sheet metal for further manufacture; metal parts for aircraft engines, missiles, and firing devices, electric vehicle cores, namely, aluminum composite tubing for further use in the manufacture of aircraft engines; sealing plates, namely, sealing caps of metal; reactor and dawn foot rings, namely, metal foot rings in the nature of ring-shaped fittings of metal

computer edited texts and still and animated images, and musical and other sounds, for interactive or other use; organization of cultural shows; lending of books and other publications; games libraries for lending of computer and electronic games; editing of printed matter, namely, books, magazines, newspapers; news reporter services, photographic reporting; translation services; rental of recorders, namely, video cassette recorders; multimedia entertainment services in the nature of recording, production and post-production services in the fields of music, video, and films; education and training in the nature of courses of instruction and classes in the fields of aerospace, defense and security; entertainment services in the nature of live musical performances; practical training, instruction and demonstration in the fields of defense, monitoring, communication and security, intelligence and geography; organization and conducting training, practice workshops, seminars, internships in the fields of aerospace, defense, and security; editing and publication of books and printed matter; film production services, exclusively in the fields of intelligence and geography, for defense and security; publication of books and periodicals on line; publishing services of books, magazines and newspapers; training on the operation, performance and security of information and position determining systems offered via online courses of instruction; arranging and conducting of colloquiums in the field of the exploitation of satellite data and derivative products; arranging and conducting of colloquiums in the field of the exploitation of satellite data and derivative products; arranging and conducting conferences in the field of the exploitation of satellite data and derivative products; arranging and conducting of conventions in the field of the exploitation of satellite data and derivative products; arranging and conducting of seminars in the field of the exploitation of satellite data and derivative products and photography; organization of exhibitions for cultural or educational purposes, photographic reporting, publication of books and written texts in the field of the exploitation of satellite data and derivative products; electronic publishing of books and periodicals online in the field of the exploitation of satellite data and derivative products; television program production; providing information on educational or entertainment events, film production, digital imaging services, publication of books

International Classes 41 - Primary Classes **US Classes** 100, 101, 107 **International Class Title** Education and Entertainment

For Compiling of data in data bases and legal data bases; business administration of correspondence exchange services, especially administration of correspondence for third parties; organization of exhibition and trade fairs for commercial or advertising purposes; business management consultation in the field of aeronautics; market research; marketing of air crafts and parts thereof; advertising; business management and administration; providing office functions; online retail store services featuring images generated by satellites or goods derived from satellite images (2D or 3D), geographical maps or topographic base maps consisting of images generated by satellites or antennae, digital evaluation models in the form of grids of components coded by elevation and receiver antennae; compilation of information into computer databases, in particular compilation of images generated by satellites or antennae, compilation of high-resolution and very high resolution digital images generated by satellites into computer databases; retail store services and wholesale distributorship services of images generated by satellites, in particular geographical images, geographical maps and topographic base maps consisting of images generated by satellites; on-line retail store services of images generated by satellite, in particular geographical images, geographical maps and topographic maps consisting of images generated by satellite or by aerial and providing commercial information relating to these products; provision of business information; business consultancy services; business consultancy services relating to internet communications; provision of business information relating to advertising services, namely, for industries, fire and government; providing a database featuring intellectual and industrial property rights available for possible

acquisition

International Classes 35 - Primary Classes **US Classes** 100, 101, 102 **International Class Title** Advertising and Business

For Building construction; custom construction and repair of and installation and mounting services for spacecraft and satellites; aircraft and satellite repair; information relating to repair of aircraft and provision of information relating to repair of aircraft, especially relating to repair of airplanes; installation of hardware for mechanical, electrical and computer interfaces between a satellite and launching rocket, especially a launch vehicle; installation of satellites on launch vehicles; services for the installation of satellites and spacecraft on launching vehicles, especially mechanical assembly, installation of electrical and computer hardware; custom construction of installations of satellites and ground stations and associated equipment, namely, antennas, computers, communication networks, office buildings, hangars; information relating to repair services and the construction of installations and equipment in the aviation sector; construction of office buildings, hangars, airfields, launching platforms, launching pads; repair of vehicles and apparatus of locomotion by land, air or water, namely, unmanned aerial vehicles, aircraft, drones and drive motors; installation, repair, servicing and maintenance of electrical and electronic installations, equipment and apparatus, aeronautic equipment, and cryptographic equipment, instruments, apparatus and devices; dismantling services for air crafts, helicopters, space crafts, rockets, launch vehicles, UAV (drones), satellites; maintenance of computer hardware; repair and maintenance in particular in the field of vehicles and of apparatus for locomotion by land, air or water as well as driving motors; maintenance of telecommunication networking hardware, apparatus and instruments; building construction consultancy

International Classes 37 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Construction and Repair

For Scientific apparatus and instruments, namely, electric, electronic or optical sensors for measuring inertia, gyrometric fibre-optic sensors for measuring inertia exclusively for space systems, namely, for satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; data processing equipment in the nature of data processors and computers for providing technical information and logistical services in connection with space systems, namely, with satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; data processing equipment for providing technical information and logistical services in connection with space systems, namely, with satellites, spacecraft, launching rockets, especially launch vehicles, and space platforms; measuring instruments in the nature of altimeters, sensors, radars and lidars for space systems, defense systems and security systems, namely, of satellites, spacecraft, launch vehicles, rockets, aircraft, helicopters; apparatus in the nature of a camera, radar, telescope, sensor for use in observing Earth from space; electronic apparatus for the encoding and transmission of data via a satellite; electronic apparatus for monitoring and controlling satellite altitude and satellite orbit; ground systems for satellites consisting of antennas, computers and communication networks; computer software for use in controlling the orbit and altitude of satellites, namely, satellite navigation receivers, stars trackers, sun sensors, gyrometric sensors, Earth sensors, accelerometers; radio transceivers; scientific apparatus, namely, mirrors for telescopes; infrared cameras; equipment bays consisting of equipment for satellites and spacecraft, namely, avionics and service modules comprising computers for running diagnostic assessments on satellites and spacecraft, electronic and electric measuring devices, power leakage detectors, observation instruments, data transmission cables, control panels, programmable controllers, communication devices, encoders, signal transceiver, altimeters, computer software; satellite altitude control and position control devices; measurement, control, observation and communication apparatus, namely, anemometers,

illuminometers, differential switches, microscopes, two-way radios, actuators, thrusters, magnetometers, gyroscopes, inertial measurement units, GPS; equipment and instruments for Earth observation as well as encoding and transmission of data via a satellite, satellite altitude and orbit control apparatus and instruments, namely, optical cameras, infra-red sensors, radar, ultraviolet sensors, laser, antennas, signal receivers, signal transmitters, platform computers for data encoding, electrical ground support equipment for on ground operation and testing of space hardware and software; satellite management computer programs; satellite control programs; radio electric transceivers and wireless radio transmission devices; avionics and service modules for satellites, spacecraft and launch vehicles in the nature of communication electronics, control electronics, navigation electronics, processors, memory; electronic, electrical and optical satellite and spacecraft modules comprising assemblies that contain the measuring and communications circuits and the auxiliary launch apparatus in a housing; devices and systems for altitude control and position regulation, namely, momentum wheels, reaction wheels, control momentum gyroscopes, control electronics, communication electronics, navigation electronics, processors; satellites for scientific and commercial purposes; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking, lifesaving and teaching apparatus and instruments, namely, radar antenna sensors, computer software for processing the flow of video images; apparatus for recording, transmission or reproduction of sound and images; blank magnetic data carriers, acoustic discs sold blank; data processing equipment and computers; blank magnetic data carriers; radio transmitters; electrical cables, fibre optic cables, electronic apparatus and instruments in the nature of blank electronic storage media; prerecorded data storage media containing flight and navigation instructions for helicopters, rotor craft and drones; optical or infrared detection equipment and apparatus, namely, binoculars, telescopes, radars, cameras, infrared sensors; thermal imagers, not for medical use; observation instruments and system comprising sensors, radar, antennas, computers, prerecorded computer software programs for the geo-localization, supervision and monitoring of objects, vehicles and persons in specific geographical zones, video display screens, electromechanical controls; infrared surveillance and tracking equipment and systems especially location systems, comprising computer hardware and digital video recording software for use in remote locations; secure observation and reconnaissance equipment and systems comprising sensors, radar, antennas, prerecorded computer software programs for the geolocalisation, supervision and monitoring of objects, vehicles and persons in specific geographical zones; heliborne surveillance equipment and systems comprising radar, antennas, sensors, prerecorded computer software programs, transmitters, receivers and network interface devices; airborne surveillance equipment and systems comprising sensors, radars, terminals, prerecorded computer software programs, transmitters, receivers and network interface devices; day/night surveillance equipment and systems comprising infra-red sensors, cameras; high precision optical devices in the nature of high resolution cameras for observation; encoders or decoders for use in connection with digital sound and image data transmitters; telemetry devices not for medical use; remote controls, radio altimetry and proximity and approach apparatus and instruments for use in the field of aeronautics and space and in aeronautics and space navigation instruments; detection apparatus and instruments for use in aeronautics and space navigation instruments, namely, radar detectors, lidars and electro optical sensors; computer security systems comprising radar detectors, antennas, satellite transmitters, receivers, converters and transponders; radar antennas, satellite transmitters and receivers, converters and transponders; electronic equipment for civilian and military use, namely, on-board electronic equipment for spacecraft, satellites, launch vehicles, rockets, aircraft, helicopters, and electronic equipment for use in ground and control stations of the aforementioned spacecrafts, satellites, launch vehicles, rockets, aircrafts, helicopters in the nature of computers, computer software, transmitters, receivers, antennas, communication electronics, sensors; electrical and electronic tracking, detection and monitoring and geo-location and geo-localization equipment; electrical and electronic equipment for radio location and radio navigation in the nature of computers,

computer software, transmitters, receivers, antennas, communication electronics, sensors; radar imagery-based airborne ground surveillance and reconnaissance equipment and systems comprising antennas, signal processors, computers, computer software, transmitters, receivers, communication electronics; sensors for air crafts without crew for flight-navigation; instruments for maritime, land, air and space navigation namely, satellite guidance instruments; guidance and navigation equipment and systems comprising fixed or portable computer, electronic and telecommunication apparatus and equipment; computer servers, communication servers and blank magnetic data storage devices, computer workstations, modems; computers; electronic memory; electronic apparatus, namely, electronic display boards, plasma display boards, electronic display screens; wireless and satellite-based hardware and software for onboard data networks for satellites; multi-platform interfaces, namely, computer hardware and software for electronic display of data, graphics and images; digital media for the storage of data and computer user terminals for the determination of position, mapping information, course guidance for land, aerial, marine or submarine vehicles; geographic information processing equipment and systems comprising satellites and GPS; apparatus and equipment for the acquisition, compression, transmission, analysis and restoration of satellite images and aerial photographs, namely, sensors, computer hardware, computer software, computer memory; image transmission equipment by digital radio link and systems comprising computers, computer memory, digital radio link electronics, namely, radio transmitters, radio receivers, modulators, demodulators, encoders, decoders, multiplexers, digital signal processors, optical components, namely, digital-to-optical converters, optical-to-RF converters, optical fibers and parts thereof; optical components and parts in the nature of optical lenses, optical mirrors, windows and diffusers, optical filters, polarizers, prisms, beam splitters, diffraction gratings, optics assemblies; spatial optic apparatus, equipment and instruments in the nature of optical lenses, optical mirrors, windows and diffusers, optical filters, polarizers, prisms, beam splitters, diffraction gratings, optics assemblies; optical apparatus, equipment and instruments for aerial reconnaissance aircraft namely, scanning infrared sensor; guidance radio-control and automatic pilot equipment and apparatus, namely, inertial guidance systems for aircraft, radio-control missile guidance systems for aircraft and automatic pilot systems for aircraft; computer navigation hardware and software for position determination, monitoring and surveillance in specific geographical areas; monitoring and control hardware and software for position determination in connection with monitoring and surveillance equipment for use in aircraft navigation; computer software and computer hardware terminals for the determination of position in connection with aircraft radar or satellite based navigation for use in navigation databases; radio navigation apparatus for use in mapping applications in connection with security and emergency equipment, and lifesaving equipment, other than for medical use; computer software for the storage of data and computer user terminals for the determination of position, mapping information and route/course guidance for land and airborne vehicles; electrical or electronic instruments and apparatus for the reception, processing and/or transmission of navigation signals and component parts thereof; electric and electronic apparatus and instruments for the review, analysis and performance monitoring of navigation data and navigation signals, and parts thereof; electric and electronic apparatus and instruments for the measurement, verification, checking, testing and monitoring of navigational positions and associated navigation data; computer software for the measurement, verification, checking, testing and monitoring of positions and associated navigation data; electronic apparatus for use in satellite localization and satellite navigation; telecommunication and radio communication apparatus featuring hardware and software for use in data encoding, data decoding, data encryption, data decryption for telecommunication and radio communication networks; computer hardware and software for data encoding, data decoding, data encryption, data decryption for use in telecommunication and radio communication networks featuring transmission by wire, cable, fiber optics, radio or satellite technology; computer servers for

use in call centers; multiplexers; de-multiplexers; electrical and electronic apparatus and instruments for controlling and administering global positioning system (GPS) based navigation networks; telecommunications receivers for telecommunication transmissions; electronic and radio-electric signal transmission apparatus for telecommunications in the domain of public safety, defense and security area; satellites for scientific use and satellites designed to receive and transmit radio electric signals; computer terminals; fixed or mobile computer terminals for use in communication networks; computer terminals for communicating, transmitting and receiving voice, image, data and multimedia data; computer network appliances, namely, gateways for the collection and management of data on the internet; computer network interface device for accessing internet protocol (IP) networks; computer software for the transmission of messages, information, data, sound and images over the airwaves, via cable, via fiber optics, via telephone, via satellite, via terminals, via telecommunication networks and via computer networks; telecommunications and desktop automation terminals for military applications; wireless telephony apparatus; mobile telephones; cordless telephones; radio paging apparatus; fax machines; PDAs (personal digital assistants); mobile devices for internet access, and parts for the above mentioned goods to allow communications and to conduct secure transactions and online business; software programs in a format exploitable by computer provided on magnetic or optical media or in a downloadable format to be used with the aforementioned products; software programs for secure communications and enabling one to authenticate, check, record and analyze business relationships and transactions via a system of controlled access rights and notifications; satellite telecommunications apparatus for use in aircraft; software for communication and radio communication networks for transmission of data via wire, cable, via fiber optics, via radio or via satellite; software for communication and radio communication networks for transmission of data via wire, cable, via fiber optics, via radio or via satellite; software for the management, administration, architecture management, configuration and protection of local or remote networks for voice, image and data; computer software and hardware for securing access to computer networks and to internet protocol (IP) networks; software for encryption and decryption applications; software for encoding and decoding applications; software for the management, administration, architecture management, configuration and protection of local or remote networks for voice, image and data; computer software and hardware for securing access to computer networks and to internet protocol (IP) networks; software for use in simulation modeling; computer software for use in modeling testing and modeling experimentation; computer servers for modeling simulation, modeling testing and modeling experimentation of civilian and military operations; computer software for the development, optimization and performance analysis of methods and algorithms, and central processing units and software modules for the processing and/or generation of navigation signals and/or data, all pertaining to fields of navigation or cartography; software designed to perform the functions of planning, acquisition, processing and dissemination of intelligence information and data exclusively in the areas of intelligence and geography, for the purpose of defense and safety; software for digital radio networks giving the user access to voice services and data such as group communications in relay mode, individual calls, short messages and localization and transmission of data, all these products for digital radio networks; software for the provision of access to an electronic messaging service; transaction security software for intranet and Internet data terminals, operating stations and terminals for presenting information graphically and textually; secure information processing apparatus for encrypting and encoding secured informational signals; computer software for use with secure telecommunications appliances for use in transmitting intelligence data; electronic handheld devices for the wireless receipt and/or transmission of secure data in the nature of messages; electrical and electronic apparatus allowing the user to save or manage personal information; software for the redirection of secure messages in an internet e-mail to one or more electronic handheld devices from a database stored in or associated with a personal computer or a server; software for the synchronization of secure data between a remote station or

device and a fixed or remote station or device; electrical and electronic apparatus and instruments, namely, computers, central processing units and software modules used for the development, optimization and performance analysis of methods and algorithms in the processing and/or generation of navigation signals and other data pertaining to navigation technology; electrical and/or electronic apparatus and instruments for displaying reports, analyses and measurement results, in the form of graphics, tables and charts resulting from the analysis of performance and the monitoring of performance of navigation signals and/or data; electrical or electronic apparatus and instruments used for examining and identifying space segments in two dimensions or in three dimensions; computer software used for examining and identifying space segments in two dimensions or in three dimensions; apparatus for monitoring flight parameters, namely, navigation and piloting software for helicopters, rotor craft and drones; communication antennas for aircraft; recording apparatus for use in navigating locomotion by land, air or water; auto-flight control apparatus for use in aircraft; real time test instruments for conducting sample tests on electronic input; USB hardware for displaying and transmitting data; data transmission equipment, namely, insulated copper wires, optical fibers, wireless communication devices for voice, data or image transmission, computer USB; analogue-digital and digital-analogue converters; simulators for the simulation of mechanical, electrical and electronic functional processes and for linking and chaining modules in the nature of computer hardware and computer software for design, improvement, adaptation and test of the indicated processes; selector switches and coordinator switches for flight navigation systems and computer systems; interface equipment featuring analogue, digital and discrete data bus interface hardware; electronic controls for testing browsable computer programs recorded on data carriers; browsable computer programs recorded on data carriers for testing aircraft, helicopters, rotor craft, spacecraft, space vehicles, satellites, UAV in the nature of drones, carrier rockets; computer hardware and software for the simulation of electronic samples and mechanical, electrical and electronic function processes; electrical and electronic display apparatus for preparing and conducting tests for checking the configuration and definition of electronic samples and for processing the test results; software, namely, databank software for managing tests on electronic samples for checking the configuration of the test system and definition of the test system; computer hardware and software for establishing test documents for use in modeling and simulating navigational processes for use in aircraft, satellites, launch vehicles, rockets, helicopters; computer hardware and software for the connection of test documents used in modeling and simulating navigational processes via internet and/or local area computer networks; sensors and communication apparatus and equipment namely, optical sensors, infrared sensors, ultra-violet sensors, radar sensors, laser, computer modems, network interface cards (NIC), Wi-Fi devices, access points; sighting telescopes for firearms; telescopes, binoculars, telescopic spectacles; protective spectacles, namely, spectacles for protection against lasers; distance measuring devices, namely, laser distance measuring devices; digital magnetic compasses; reconnaissance cameras, aerial photography equipment, namely, camera accessories, namely, camera lenses, memory cards, batteries, flashes, lighting, remote controls, filters, camera mounting accessories/components, namely, tripods and monopods; aerial cameras; periscope systems comprising mirrors, lenses, cameras, thermal imagers, image intensifiers, optical filters, torque drive rotator; stabilized sensor platforms, namely, turrets and gimbals used to capture imagery that verifies the detection, recognition, identification and geo-location of persons, places and objects from the air and from the ground; night vision devices namely, night vision goggles, residual light image amplifiers; laser target illuminators; software to assess, monitor and control data security within information technology networks; scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signaling, checking, life-saving and teaching apparatus and instruments in the nature of precision measuring apparatus, programmable controllers, infrared sensors, optical sensors, ultraviolet sensors, radar sensors, image recording apparatus, distance recording apparatus,

distance measuring apparatus, navigation apparatus for on-board vehicles, lasers, electronic measuring devices; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity namely, capacitors, rectifiers, resistors, attenuators, circuits, inductors, electrical distributors; industrial geoproduction system composed of an automatic geospatial data processor for processing, analyzing, producing and storing satellite, aerial or terrestrial images, data in 3D; blank magnetic data carriers, blank magnetic recording discs; mechanisms for coin-operated apparatus; cash registers, calculating machines, data processing equipment and computers; fire-extinguishing apparatus; aerials; tape recorders; magnetic tape units for computers; blank magnetic tapes for computers; prerecorded videotapes featuring information in the fields of aerospace, defence and security; film cameras; video cameras; blank audio-video compact discs featuring information in the fields of aerospace, defence and security; blank optical compact discs; blank magnetic disks for computers; blank optical disks; blank optical data media; blank magnetic data media; software exclusively for the field of satellite imaging and data; computer software for processing data gathered from satellites; apparatus for simulating the development of infrastructure, namely, computer hardware and software for simulating the location and placement of infrastructure; computer hardware and computer software for creating and updating development plans and maps and for observing parcels of agricultural land and optimizing crop development and the monitoring thereof; compact disc players; optical character readers; computer game software; downloadable computer software for control, communication, database, encryption, decryption, tracking for aerospace, defense and security; computer software for processing and analyzing photographs, namely, aerial shots, satellite or terrestrial shots; computer; computer software for stereographic reproduction, for preparing digital terrain models, for modeling in 3D, ortho, orthoimages and thematic maps; prerecorded computer software databases containing geographic, geologic, cartographic and topographic data; computer files and computer software containing reproductions of terrain and digital maps; equipment for databases and for access to databases in the nature of computer hardware, computer software and peripherals, namely, computer mice, monitors, touch screens, microphones, scanners, keyboards, printers, webcams, and loudspeakers; computer software for processing and analyzing photographs such as aerial and satellite photographs; computer software for stereographic projections, digital land models, orthoimages and thematic maps; computerized files and software packages, namely, pre-recorded computer disks and pre-recorded optical disks featuring geographic, geologic, cartographic and topographic data; computerized files and software for ground mapping and digital maps; satellite navigation equipment in the nature of vehicle radios, sensors, navigation instruments, satellite signal/communication processors, antenna, navigation apparatus for on-board vehicles, GPS, data processing equipment; satellites for scientific purpose, in particular earth observation satellites; computer software for processing, analysis, reproduction and storage of images, aerial or satellite photograph; database equipment and database access equipment in the nature of computer hardware and peripherals, namely, computer mice, monitors, touch screens, microphones, scanners, keyboards, printers, webcams, and loudspeakers; computer hardware; database equipment, namely, computer hardware, computer software, computer modems, computer printer, computer memory; database equipment, namely, computer, datatransmission cables, magnetic drives, data processing apparatus; data base management software for stereographic reproduction, for storage, preparation, treatment and analysis of drawings, images, photos, charts, aerial and satellite photographs, surface models; blank magnetic data carriers for computer software; computerized files and computer software containing or for stereographic reproduction, for storage, preparation, treatment and analysis of surface models, images and photos; data processing apparatus to process data from satellites; photography carriers for dark plates; compact disk players; computer software for applications in the fields of aerospace, defense and security for use in control, communication, database, encryption, decryption, tracking; optical mirrors; satellite navigation systems comprising space segment, namely, satellites; satellite navigation systems comprising control segment,

namely, tracking stations; satellite navigation systems comprising user segment, namely, GPS user receivers and hand-held devices; satellites for scientific purposes, in particular earth observation satellites and radar satellites; airborne sensors for control, monitoring, observation, measurement and imagery; radio transmitters; apparatus for processing, analysis, reproduction and storage of satellites images, namely, radar sensors, infrared sensors, ultraviolet sensors, optical sensors; computer database hardware; computer software for database applications in the fields of aerospace, defense and security; computer printers and computer memories; electric and electronic apparatus to generate digital elevation models; computer software containing digital elevation model databases; computer software for industries, specifically fire departments and governments for operational systems, customer management, asset management, geographical information systems, computer aided design, real-time visualization and mobile systems and configuration of the same for usage on appropriate computer hardware

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Legal counseling; licensing of intellectual property in the field of copyrights; legal consultancy; flight security guard services; licensing of intellectual property in the field of patents, trademarks and designs; security services, namely, monitoring of burglar and security alarms, private investigation and security services; security guard services

International Classes 45 - Primary Classes **US Classes** 100, 101 **International Class Title** Personal and legal services

For Telecommunication services, namely, local and long distance transmission of voice, data, images and graphics by means of satellite transmissions; rental of telecommunications facilities; electronic massaging via the Internet, extranet, intranet; communication services via radio, telephone, telegraph as well as via any means of remote transmission of data, via video text, especially via terminals, computer peripherals or electronic and/or digital equipment, videophones, picture phones and videoconferencing; data transmission, especially batch transmissions, sending and dispatching of electronic documents, e-mail services; transfer of telephone calls or telecommunications messages; mobile telecommunications network services, namely, wireless mobile telephone calling plans; satellite transmission; radio and television broadcasting and Internet broadcasting of multimedia programs in general for interactive use; communication services via computer networks in general, namely, electronic transmission of data, voice, graphics, images, and documents among users of computers; providing telecommunication connection services via satellite and satellite constellations; electronic transfer of messages and data via the Internet, extra net, intranet; communication services via radio, telephone, telegraph as well as via any means of remote transmission of data, via video text, especially via terminals, computer peripherals or electronic and/or digital equipment, videophones, picture phones and videoconferencing; data transmission services, especially for batch transmissions, sending and dispatching of electronic documents, e-mail services; e-mail services; telephone call transfer or telecommunication services, namely, telephone communications services; mobile radio telecommunication services; rental of modems; rental of modem peripherals; rental of access times to a database server; telecommunication services, namely, electronic transmission of data via computer server; radio communications services, computer-assisted transmission of messages and images; emission and reception of data, signals and information processed by telematics, by computer or by telecommunication apparatus and instruments; electrical or electronic exchange of computerized data accessible via telecommunication networks; wireless secure e-mail and data messaging services; electronic messaging services; computer-aided transmission and reception of data, signals, images, information, encrypted messages, and encrypted images; telecommunication transmission of messages, data,

voice, graphics, and images sent by satellite; data transmission services, data transfer services and services for the provision of access to data online, in especially in the fields of satellite navigation and positional data, media for navigation and positional data; providing temporary access to computers for the purpose of running software programs and cloud computing; computer-based transmission of positioning and navigation signals and data for simulation and experimentation; provision of telecommunication data and information on Internet; secured communication transmission of data and vocal data on behalf of third parties, including user authentication and data integrity; telecommunication gateway services; telecommunications by e-mail; telecommunications via satellite; digital network telecommunications services; telecommunications consultation; leasing of telecommunications lines; telecommunications services, namely, ISDN services; transfer of data by telecommunications; telecommunications services, namely, personal communication services; transmission of database information via telecommunications networks; providing telecommunications connections to the internet or databases; telecommunications services for providing multiple-user access to a global computer network; telecommunications services, namely, wireless telephony and wireless broadband communications; telecommunication services, namely, transmission of voice, data, graphics, images, audio, video and documents by means of telecommunications networks, wireless communication networks, satellite communication networks and the internet; telecommunication services, namely, transmission of voice, data, graphics, images, audio, video and documents, in the field of aerospace, defense and security; providing user access to a global computer network; computer-aided transmission of messages and images, in particular high-resolution and very high resolution images and geographical information; satellite transmission of message and images, in particular high-resolution and very high resolution images and geographical information; providing access to databases, in particular to image databases by satellites or aerials, transmission of global digital elevation models data and geographical information; providing access to electronic databases and to information retrieval centers for drawings, images, photos, carts, aerial and satellite photographs, surface models; rental of access time to global computer networks; electronic data transmission; providing access to databases on the Internet; computer-based transmission of data and images for worldwide communication networks or for private or user restricted networks

International Classes 38 - Primary Classes **US Classes** 100, 101, 104 **International Class Title** Communication

For Air transport; aircraft rental; launch and placement in prescribed orbit of satellites of others; launching on satellites for others; flight tracking services, namely, providing flight arrival, departure and trajectory information; vehicle rental; air traffic management; flight and air traffic management services, namely, flight planning services and air traffic control services; traffic information; airport operation services, namely, air traffic control services; airport management; airport organization

International Classes 39 - Primary Classes **US Classes** 100, 105 **International Class Title** Transportation and Storage

For Printing; material treatment services in connection with recycling aircrafts and parts of aircraft; processing of aerial and satellite, monochrome or multi-spectral photographs for third parties; processing of stereoscopic images; rental of printers and peripherals for printers

International Classes 40 - Primary Classes **US Classes** 100, 103, 106 **International Class Title** Material Treatment

For Carbon fibers, other than for textile use

For Consultancy computer software recorded on computer media for evaluating printing equipment needs and printing equipment functions in the fields of printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter and paper; sales computer software recorded on computer media for evaluating printing equipment needs and printing equipment functions in the fields of printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter and paper; and computer software for operating printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter and paper; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of printing systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of printing systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines,

equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; and computer software for operating printing systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines, engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines, engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; and computer software for operating varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines, engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of air- technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of air- technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; and computer software for operating air- technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; sales computer software recorded on computer media for evaluating equipment needs and

equipment functions in the fields of drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; and computer software for operating drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; electronic regulating devices, electronic control devices, electronic monitoring devices, electronic quality control devices, electronic production control devices, electronic temperature monitoring devices, electronic web tension controls, and recorded computer operating software, all being in the nature of accessories for printing machines, offset rotary printing machines, coating machines, digital printing and marking machines, machines for the graphics industry and machines for the further processing of printed matter and paper, namely, for transporting, cutting, folding, gathering, clipping, packing, collecting, sorting, binding, scanning, checking, perforating, glueing, stapling, tieing, sealing, book-binding; electronic regulating devices, electronic control devices, electronic monitoring devices, electronic quality control devices, electronic production control devices, electronic temperature monitoring devices, and computer operating software, all being in the nature of accessories for printing systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; electronic regulating devices, electronic control devices, electronic monitoring devices, electronic quality control devices, electronic production control devices, electronic temperature monitoring devices, and computer operating software, all being in the nature of accessories for varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines, engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; electronic regulating devices, electronic control devices, electronic monitoring devices, electronic quality control devices, electronic production control devices, electronic temperature monitoring devices, and computer operating software, all being in the nature of accessories for air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; electronic regulating devices, electronic control devices, electronic monitoring devices, electronic quality control devices, electronic production control devices, electronic temperature monitoring devices, and computer operating software, all being in the nature of accessories for drying ovens, drying apparatus, heat stores, heat exchangers; electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment of subassemblies and parts for printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; electric and electronic measuring and testing apparatus and electronic instruments for

adjustment and pre-adjustment of subassemblies and parts for systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; electric and electronic measuring and testing apparatus and electronic instruments for adjustment and pre-adjustment of subassemblies and parts for varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines and engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; electric and electronic measuring and testing apparatus and electronic instruments for adjustment and pre-adjustment of subassemblies and parts for air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors air heaters, air coolers, air filters and nozzle chambers for humidification; electric and electronic measuring and testing apparatus and electronic instruments for adjustment and pre-adjustment of subassemblies and parts for drying ovens, drying apparatus, heat stores, heat exchangers and for measuring, testing and adjusting parts thereof, in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres

separated from machines; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for sub-assemblies and parts for varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines and engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for sub-assemblies and parts for varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines and engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; consultancy computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; sales computer software recorded on computer media for evaluating equipment needs and equipment functions in the fields of electric and electronic measuring and testing apparatus and instruments for adjustment and pre-adjustment for subassemblies and parts for drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and

regulating of ink levers, ink rollers, damping rollers, register adjusting devices in printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of ink levers, ink rollers, damping rollers, register adjusting devices in printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of ink levers, ink rollers, damping rollers, register adjusting devices in printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for the transporting and storage of printed matter and paper and paper reels for printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for the transporting and storage of printed matter and paper and paper reels for printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of devices for the transporting and storage of printed matter and paper and paper reels for printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation remote monitoring, control and regulating of devices for the changing and transporting and storage of printing plates; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation remote monitoring, control and regulating of devices for the changing and transporting and storage of printing plates; computer software for operating the remote control, remote operation remote monitoring, control and regulating of devices for the changing and transporting and storage of printing plates; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for the cleaning of rollers in inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs,

equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for the cleaning of rollers in inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of devices for the cleaning of rollers in inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for the storage and adjustment of rollers in inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printing machines, offset printing machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for the storage and adjustment of rollers in inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printing machines, offset printing machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of devices for the storage and adjustment of rollers in inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printing machines, offset printing machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of inking apparatus and damping units and printer engine cylinders in printer engines; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of inking apparatus and damping units and printer engine cylinders in printer engines; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of inking apparatus and damping units and printer engine cylinders in printer engines; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for tempering for inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printer engines; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of devices for tempering for inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printer engines; computer software for operating the remote control, remote operation, remote monitoring, control

and regulating of devices for tempering for inking apparatus or damping units and cylinders and inkjet printing heads and laser systems in printer engines; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of cutting equipment and cutting cylinders in printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of cutting equipment and cutting cylinders in printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of cutting equipment and cutting cylinders in printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry and machines for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of registers and register marks in printing machines, offset printing machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of registers and register marks in printing machines, offset printing machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of registers and register marks in printing machines, offset printing machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating for quality control in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic

materials; software for the remote control, remote operation, remote monitoring, control and regulating for quality control in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines and engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines and engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; computer software for operating the remote control, remote operation, remote monitoring, control and regulating for quality control in varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines and engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; computer software for operating the remote control, remote operation, remote monitoring, control and regulating for quality control in air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and

compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating for quality control in drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; computer software for operating the remote control, remote operation, remote monitoring, control and regulating for quality control in drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof, in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of web tension settings in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of the remote control, remote operation, remote monitoring, control and regulating of web tension settings in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software for operating the remote control, remote operation, remote monitoring, control and regulating of web tension settings in printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of data-processing devices for prepress, the printing of printed matter, the further processing of printed matter, production control, production planning; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of data-processing devices for prepress, the printing of printed matter, the further processing of printed matter, production control, production planning; computer software for operating data-processing devices for prepress, the printing of printed matter, the further processing of printed matter, production control, production planning; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of data-processing devices for printing machines, the printing of printed matter, the further processing of printed matter, production control, production planning; sales computer software recorded on computer media for evaluating equipment needs,

equipment functions, software needs and functions in the fields of data-processing devices for printing machines, the printing of printed matter, the further processing of printed matter, production control, production planning; computer software for operating data-processing devices for printing machines, the printing of printed matter, the further processing of printed matter, production control, production planning; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of interfaces and data transfer for printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry, machines for the further processing of printed matter and paper and parts thereof; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of interfaces and data transfer for printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry, machines for the further processing of printed matter and paper and parts thereof; computer software for operating interfaces and data transfer for printing machines, offset rotary printing machines, coating machines, digital printing and marking machines and machines for the graphics industry, machines for the further processing of printed matter and paper and parts thereof; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of interfaces and data transfer for systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of interfaces and data transfer for systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; computer software for operating interfaces and data transfer for systems, equipment, apparatus, filters, separators, suction and conveying devices for air-technology cleaning, dust removal and air separation from machines and rooms equipped therewith, air filters, fans, fibre separators, air compressors and air ejectors for machines, collecting devices, machines, equipment and apparatus for compacting, filling and pressing of particles, dust and fibres separated from machines; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of interfaces and data transfer for varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines, engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of interfaces and data transfer for varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans,

printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines, engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; computer software for operating interfaces and data transfer for varnishing machines, drying machines, drying ovens, pallet changing and transfer machines, stacking machines, machines for handling sheets and plates, food dispensing machines, apparatus for the surface treatment of metals, screen printing machines, pad printing machines, flexographic printing machines, gravure printing machines, tinplate printing machines, printing machines for use on cans, printing machines for use on hollow bodies, stamping machines, hot-embossing equipment, thermal transfer equipment, photographic printing machines, labelling machines, engraving machines, inkjet printing equipment, laser marking equipment and laser printing equipment; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of for interfaces and data transfer for air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions for use by sales consultants in the fields of for interfaces and data transfer for air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; computer software for operating for interfaces and data transfer for air-technology systems, air-technology equipment, air-conditioning, heating, cooling, aeration, de-aeration, humidifying and dehumidifying systems and equipment, air treatment systems, air conveying devices, in particular ventilators, fans and compressors, air heaters, air coolers, air filters and nozzle chambers for humidification; consultancy computer software recorded on computer media for evaluating equipment needs, equipment functions, and software needs and functions in the fields of interfaces and data transfer for drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; sales computer software recorded on computer media for evaluating equipment needs, equipment functions, software needs and functions in the fields of interfaces and data transfer for drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; computer software for operating interfaces and data transfer for drying ovens, drying apparatus, heat stores, heat exchangers and parts thereof in particular catalytically active coatings, heat exchanger ceramics, heat exchanger stones, heat exchanger surfaces, honeycomb structures and integrated catalysts for exhaust air purification systems, thermal energy stores, solar collectors, solar modules for heat generation and regulation and safety accessories for gas appliances; computer software recorded on computer media for operating remote control, remote operation, remote monitoring, control and regulating of devices for the transporting and storage of printed matter and paper and paper reels and plastic and plastic reels for printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; computer software recorded on computer media for operating transport, packaging and storage of

remote controls, remote operation devices, remote monitoring devices, controls and regulating devices for devices for the transporting and storage of printed matter and paper and paper reels and plastic and plastic reels for printing machines, offset printing machines, coating machines, digital printing and marking machines and machines and mechanical apparatus for the graphics industry and machines and mechanical apparatus for the further processing of printed matter in the nature of paper, plastics, metal, organic and inorganic materials; structural replacement parts for the aforesaid goods, included in this class

For Batteries and cells for electric cars; electrical batteries and cells for vehicles; magnetic disks and magnetic tapes whereon computer software is recorded administration of computer networks, for database management, for application and data base integration, to maintain and operate computer systems; computer peripheral devices; computers; automated billing machines for processing accounting information; slide-rules; semiconductor wafers; solar batteries; fuel cells; electronic card readers; films for liquid crystal displays to expand viewing field, namely, polarizing films specially adapted for liquid crystal displays; batteries for automobiles; optical glasses; ozonisers being ozonators; electrolysers being electrolytic cells; egg-candlers; blueprinting machines; cash registers; coin counting or sorting machines; electric sign boards for displaying target figures, current outputs or the like; photo-copying machines; manual calculator; mathematical instruments, namely, calculators; time and date stamping machines; time clocks being time recording devices; punched card office machines; voting machines; postage stamp checking apparatus; mechanisms for coin-operated car parking gates; life-saving apparatus and equipment, namely, life jackets, life rafts, decontamination showers; fire extinguishers; fire extinguishing apparatus, namely, fireplugs; fire hose nozzles; sprinkler systems for fire protection; fire alarms; gas alarms; anti-theft warning apparatus, namely, theft alarms; protective helmets, railway signal apparatus, luminous or mechanical; vehicle breakdown warning triangles; luminous or mechanical road signs; breathing apparatus for divers, namely, rebreathers; breathing apparatus for divers, namely, compressed air bailout units; simulators for the steering and control of vehicles; electronic sports training simulators; cinematographic machines and apparatus; measuring or testing machines and instruments, namely, measuring machines and instruments, screw thread measuring machines and instruments; rotary converters; phase modifiers; electrical batteries and cells; electric or magnetic meters and testers, namely, electric meters, electrical outlet tester, magnetometers; electric wires and cables; electric buzzers; telecommunication devices and apparatus, namely, telecommunication towners, telecommunication exchangers, electrical transformers, portable telecommunication instant messaging devices; electronic machines, apparatus and their parts, namely, electronic taximeters, electronic plotters; magnetic cores; resistance wires; electrodes, other than welding electrodes or medical electrodes; fire engines; gloves for protection against accidents; dust masks; gas masks; welding masks; fireproof garments; spectacles being eyeglasses and goggles for safety; spectacles being eyeglasses and goggles for driving; spectacles being eyeglasses and goggles for ski; spectacles being eyeglasses and goggles for snow; spectacles being eyeglasses and goggles for swimming; electronic circuits and CD-ROMs recorded with game programs for hand-held games with liquid crystal displays; weight belts for scuba diving; protective helmets for sports; air tanks for scuba diving; regulators for scuba diving; phonograph records featuring music; metronomes; electronic circuits and CD-ROMs recorded with automatic performance programs for electronic musical instruments; downloadable music files; exposed cinematographic films, exposed slide films; slide film mounts; downloadable image files in the field of oil, energy and gas; recorded video discs and video tapes in the field of oil, energy and gas; electronic publications, namely, magazines, manuals, books, newsletters in the field of oil, energy and gas; fire hose; ear plugs for swimmers; ear plugs for divers; observation rockets; nautical, surveying, photographic, cinematographic, optical, weighing, measuring, life- saving and teaching apparatus and instruments, namely, surveying instruments, optical receivers, optical readers, weighing scales, weighing machines; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, power switches, electrical controllers; apparatus for recording, transmission or reproduction of sound or images, magnetic data carriers; blank recording discs; blank compact discs, DVDs and other digital recording media; compact discs, DVDs and other digital recording media

featuring digital recordings; computer software for creating searchable databases of information and data, for computer system and application development, deployment and management; fire-extinguishing apparatus

International Classes 9 - Primary Classes **US Classes** 21, 23, 26, 36, 38 **International Class Title** Electrical and Scientific Apparatus

For Propane gas supplying; liquefied natural gas supplying ; liquefied petroleum gas supplying; railway transport; car transport; providing road and traffic information ; vehicle-driving services; marine transport; air transport; packaging of goods for transportation; merchandise packaging for others; freight brokerage; cargo unloading; removal of home furnishings for relocation purposes; removal services, namely, moving home furnishings; removal of furnishings of offices, shops, stores and factories for relocation purposes; removal services, namely, moving furnishings of offices, shops, stores and factories; brokerage of vessels; rental of vessels; chartering of vessels; refloating of ships; ship piloting; arranging and booking of travel tours; escorting of travel tours; travel arrangement and reservation services excluding those for lodging, namely, travel route planning, booking seats for travel; warehousing services; temporary safekeeping of personal belongings; temporary storage of deliveries; gas supplying; electricity distribution; water supplying; heat supplying; rental of warehouse space; parking services, namely, vehicle parking, parking place rental, parking lot services, parking garage services; providing toll roads; providing vessel mooring facilities; airport services; operating of parking places; rental of loading-unloading machines and apparatus; car rental; rental of vessels; rental of wheelchairs; rental of bicycles; rental of aircraft; rental of mechanical parking systems; rental of packaging or wrapping machines and apparatus; rental of refrigerator-freezers for household purposes; rental of freezers for household purposes; rental of freezing machines and apparatus; rental of gasoline station equipment not for repair and maintenance of automobiles, namely, equipment for gas supplying; rental of non-electric prime movers for vehicles; packaging and storage of goods; travel arrangement, namely, coordinating travel arrangements for individuals or groups

International Classes 39 - Primary Classes **US Classes** 100, 105 **International Class Title** Transportation and Storage

For Lubricating oils; all-purpose lubricants and lubricating grease; industrial lubricants; industrial lubricating oils; lubricants and lubricating oils for automobiles; moistening oil in the nature of lubricating oil; liquefied petroleum gas; solid lubricants for industrial purposes; lubricating graphite; grease for shoes and boots; leather preserving oil and grease; solid fuels; liquid fuels; gaseous fuels; industrial gasoline; industrial grease; industrial oils; non-mineral oils and greases for industrial purposes not for fuel; waxes being raw material; lamp wicks; candles, industrial oils and greases; lubricants, namely, lubricating oils, lubricating graphite, synthetic lubricating oils; fuels, namely, motor spirit and illuminants; candles and wicks for lighting; engine oil; fuels; engine oils and greases for industrial purposes not for fuel; fuel gas; fuel oil; lubricating grease; coal; cutting fluids; gas oil in the nature of fuel oil; gasoline; kerosene; motor oil; oil-gas, namely, liquefied petroleum gas; petrol; petroleum, raw or refined; non-chemical additives for motor fuel; non-chemical additives for oils

International Classes 4 - Primary Classes **US Classes** 1, 6, 15 **International Class Title** Lubricants and Fuels

For Mica raw or partly processed; valves of rubber or vulcanized fiber not including machine elements; pipe gaskets; non-metal gaskets for use in the oil and energy field; gasket material in sheets for use in the oil and energy field; junctions for pipes not of metal; asbestos fire curtains; safety curtains of asbestos, namely, asbestos fire curtains; floating anti-pollution barriers; electrical insulating oils; electrical insulating materials; washers of rubber or vulcanized fiber; chemical fiber for insulating purposes not for textile use; asbestos; [rock wool;] slag wool for use as a building insulator; rubber thread and covered rubber yarn not for textile use; chemical fiber yarn and thread not for textile use; asbestos yarn; asbestos fabrics; asbestos felt;

insulating gloves; rubber cords and laces; asbestos cords and strings; asbestos nets; industrial packaging containers of rubber; rubber stoppers for industrial packaging containers; rubber lids and caps for industrial packaging containers; plastic sheeting for agricultural purposes; condenser paper, namely, flame retardant paper used to insulate buildings; asbestos paper; vulcanized fiber; plastic semi-worked products including carbon fibers, namely, semi-worked synthetic plastic and synthetic resins as semi-finished products in form of pellets, rods, foils, foams, fibers, films and sheets; plastic semi-worked products, namely, semi-worked synthetic plastic and synthetic resins as semi-finished products in form of pellets, rods, foils, foams, fibers, films and sheets; rubber raw or semi-worked; [soundproofing materials of rock wool not for building purposes;] asbestos boards; asbestos powder; unprocessed and semi-processed rubber, gutta-percha, gum, asbestos, and mica; plastics in extruded form for use in manufacture; flexible pipes, not of metal; plastic substances, semi-processed; insulating oils; Materials for storing heat for air conditioning apparatus, namely, insulating sleeves for air conditioners

International Classes 17 - Primary Classes **US Classes** 1, 5, 12, 13, 35, 50 **International Class Title** Rubber Goods

For Inspection of automobiles for automobile safety purposes; agency services for inspection of automobiles for automobile safety purposes; research and provision of scientific technology information; design of air conditioning systems; design of machines and apparatus; research on soil pollution, design of industrial processing plants; plant engineering; engineering services in the nature of design and development of refinery plants of oil; chemical analysis of petroleum products; chemical analysis of metals; research, exploration and development of petroleum oil and natural gas resources; research, development, testing and analysis relating to manufacturing, processing and using of petroleum products and raw materials thereof; providing meteorological information; architectural design; surveying; geological surveys or research; designing of machines, apparatus, instruments including their parts or systems composed of such machines, apparatus and instruments; computer software design, computer programming, or maintenance of computer software; technological advice relating to computers, automobiles and industrial machines; testing, inspection or research of pharmaceuticals, cosmetics or foodstuffs for quality control purposes; research on building construction or city planning; testing or research on prevention of pollution; testing or research on electricity; testing or research on civil engineering; testing, inspection or research on agriculture, livestock breeding or fisheries; testing or research concerning the functionality of machines, apparatus and instruments; rental of measuring apparatus; rental of computers; providing temporary use of non-downloadable computer programs for creating searchable databases of information and data, for computer system and application development, deployment and management; rental of laboratory apparatus and instruments; rental of technical drawing instruments; design and development of computer hardware and software

International Classes 42 - Primary Classes **US Classes** 100, 101 **International Class Title** Scientific and computer services

For Copper ores, copper unwrought or semi-wrought and copper alloys; indium and its alloys; titanium and its alloys; tungsten ores, tungsten iron and tungsten alloys; cobalt ores and cobalt alloys ; cadmium and its alloys; outdoor blinds of metal; iron and steel; nonferrous metals and their alloys for sputtering targets; nonferrous metals and their alloys; ores of metal; metal materials for building or constructions, namely, linings of metal for building purposes, metal partitions for building, frames of metal for building, building boards of metal; pre-fabricated metal building assembly kits; loading and unloading pallets of metal; metal turntables for load handling; metal traversers for load handling; artificial fish reefs of metal; prefabricated sectional poultry houses of metal; paint spraying booths of metal; metal molds for forming cement products;

pulleys of metal, not machine elements; valves of metal, not machine elements; metal junctions for pipes; metal flanges; metal keys being a mechanical element of a keyway and a keyseat; metal cotter pins; railway points; road signs of metal not luminous nor mechanical; beacons of metal non- luminous; liquid storage tanks or reservoirs of metal; liquid storage tanks or reservoirs of metal, not of masonry, industrial water storage tanks of metal; industrial water tanks of metal, not of masonry; liquefied gas storage tanks of metal; gas storage tanks of metal; internal floating lids of aluminum for use with gas or liquefied gas storage tanks; anchors; metal mooring bitts; mooring bollards of metal; containers of metal for transport; anvils; swage blocks; metal hardware, namely, springs, washers, pulleys, nuts; wire ropes; wire nets and gauzes; industrial packaging containers of metal not including metal stoppers, lids and caps; metal stoppers for industrial packaging containers; metal lids and caps for industrial packaging containers; metal nameplates and door nameplates; metal chains for dogs; metal stepladders and ladders; letter boxes of metal; hat-hanging hooks of metal; water tanks of metal for household purposes; tool boxes of metal empty; towel dispensers of metal; metal joinery fittings; safes; upright signboards of metal; transportable greenhouses of metal for household use; metal tombs and metal tomb plaques; ferrules of metal for canes and walking-sticks; crampons being climbing irons; metal carabiners being metal hardware; rock pitons of metal; diving platforms of metal; spurs; sculptures of metal, man-made garden ponds of metal structures; common metals and their alloys; metal building materials, namely, tiles of metal for building, frames of metal for building, brackets of metal for building, metal reinforcement materials for building ; transportable buildings of metal; materials of metal for railway tracks; non-electric cables and wires of common metal; pipes and tubes of metal; ores of metal
